

# AMERICAN Small Farm

Volume 16, Number 12

December 2007

## CONTENTS

### Features

#### Green Field Farms' Goal Is To Secure The Future 6

"Forty-five years ago Amish agriculture was not so different from conventional agriculture," says Wayne Wengerd of Dalton, Ohio, but times have changed. A meeting in 2003 launched the beginning of Green Field Farms, a 100 percent Amish-owned, nonprofit cooperative. Read this article to discover what is happening.

#### Raising Snails 10

Heliciculture is the process of farming or raising snails. Snail farming on a large-scale basis requires a considerable investment in time, equipment, and resources. Prospective snail farmers should carefully consider these factors, especially if their goal is to supply large quantities to commercial businesses.

#### The Vertical Farm 14

To address the problems of traditional farming now and those perceived to soon emerge onto the horizon, an alternate way of food production is being proposed. This new way involves growing large amounts of produce within the confines of high-rise buildings.

#### What Is Your State Doing For Small Farms? 16

This month we have picked Alaska or "The Land of the Midnight Sun" as the 24th state in our continuing project to let you know where you can find small farm information and help. We welcome your additions and suggestions as we continue our mission of finding profit-making ideas.

### Aquatic Farmer Section

#### Aquaponics—Blending Hydroponics with Aquaculture 18

Aquaponics is a combination of recirculating aquaculture (fish farming) with hydroponics (growing vegetables, flowers, and/or herbs without soil). Recent advances by researchers and growers alike have turned aquaponics into a working model of sustainable food production.

#### Hybrid Striped Bass Research in High Gear 20

The production of hybrid striped bass (HSTB) is one of the fastest growing segments in U.S. aquaculture. Production has increased during

the past 15 years expanding at a rate of 7 percent annually.

#### Prevention Of Winter Fish Kills In Ponds And Lakes 22

Ponds and lakes in the northern part of the United States have, in the past, experienced fish kills due to lack of dissolved oxygen in the water. Oxygen is essential to the metabolism of all aerobic (air breathing) organisms. Read this article for prevention tips.

### Columns & Departments

#### Small Farm Talk 3

This month Editor Andy Stevens has a special American Small Farm good neighbor of the month and something to think about during the holidays.

#### Over The Fence 8

This column is a place for you to share your ideas and learn about what is happening on family farms.

#### Homeland Treasures 24

Yolanda & Friends Quilt Patterns are featured.

#### On the bookshelf 26

Books that can help you do a better job on your farm.

#### Recipes 27

This month we feature recipes healthy seafood recipes.
